

ACDelco Technical Training

With Virtual Training being utilized more than ever last year, ACDelco is pleased to offer you more Live 1 hour Virtual MyShop Training for all of your staff. This is your opportunity to take part in interactive and informative training. We are offering the **Engine Load Sensor Diagnosis** course in which we have included a brief description on what will be covered during the session.

Engine Load Sensor Diagnosis

This 1-hour MyShop covers airflow calculations, the operation of engine load sensors, the operation of sensors found in forced induction systems, and the diagnosis of engine load sensors.
